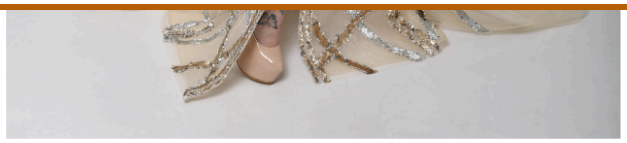
Logo name bigger on home page

Need to add a “La Maison” segment on home page for brand and designer history

HOME PAGE COMMENTS

-NEW ARRIVALS and PRE FALL font too heavy on the eye / too thick / too big
- “Discover” instead of “shop all”

+



Spring Summer 2023 8

Spring Summer 2023 7

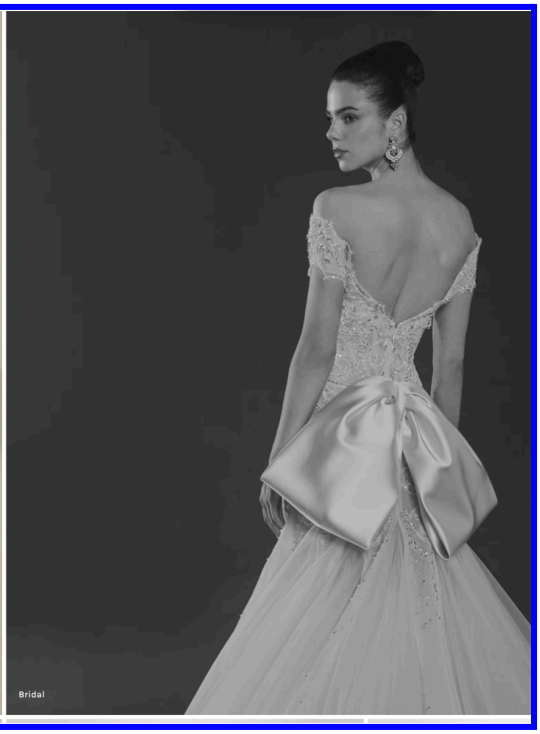
Image description should just be “Look 8” (no SS23 ect) because they will be in designated season / collection anyways

SHOP THE LOOK

HAUTE COUTURE

Antonio's Couture specializes in creating exquisite, custom-made dresses that blend elegance and luxury. Each gown is crafted with meticulous attention to detail, using high-quality fabrics to ensure a perfect fit and timeless style.

Delete “shop the look” sections, no need (add later after accessories added)



EX: Instead, could follow up home page video and prefall with “ready to wear” and “bridal” sections

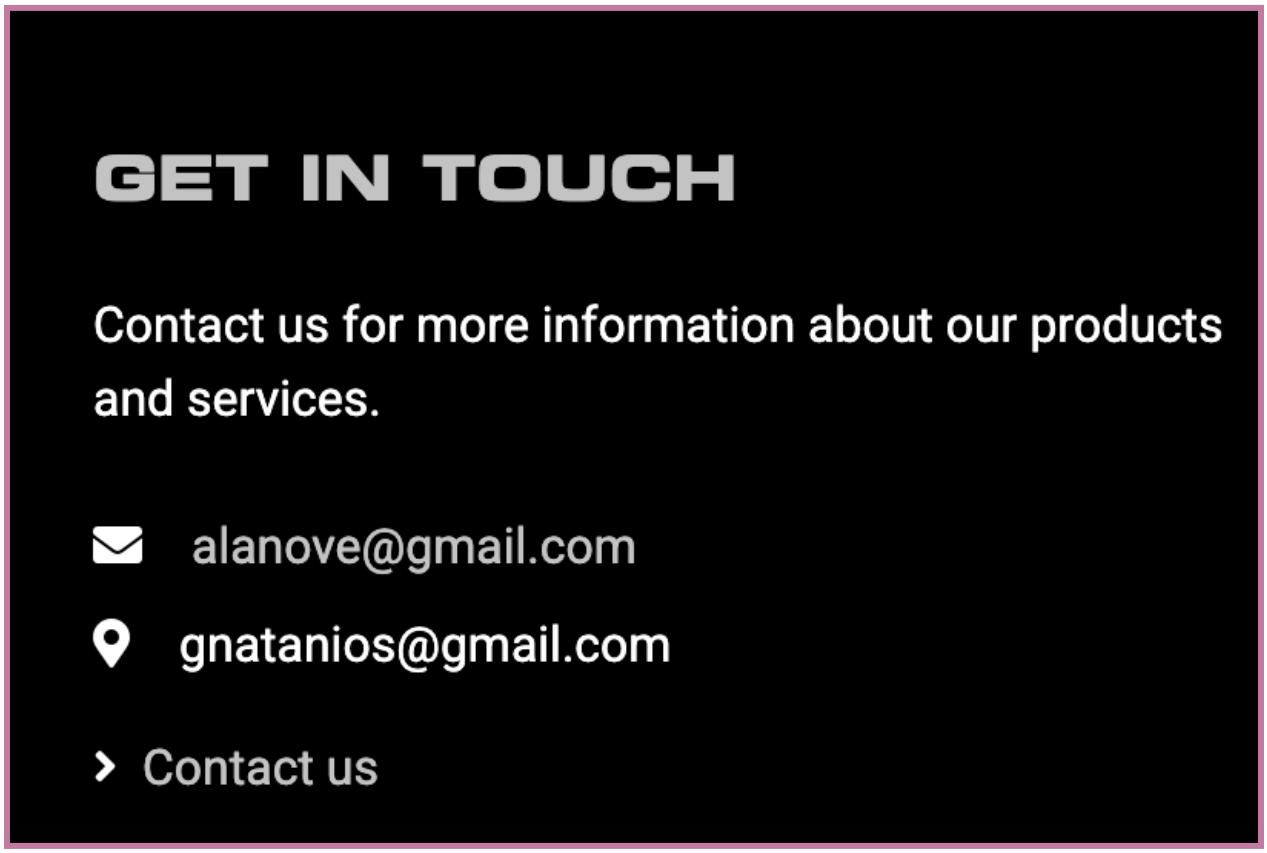
OR

ADD BRIDAL VIDEO (COMPILATION OF BRIDAL REELS from latest bridal collection) below “pre fall section” → I like this idea more

So in conclusion homepage:

- Latest collection video (larger logo on top of it)
- Introducing pre-fall 2026 “discover now”
- New arrivals (images of latest collection / collection in video)
- Introducing Spring 2027 bridal (with small video on left, and introducing text on left)

More clean and chic font, this one too thick

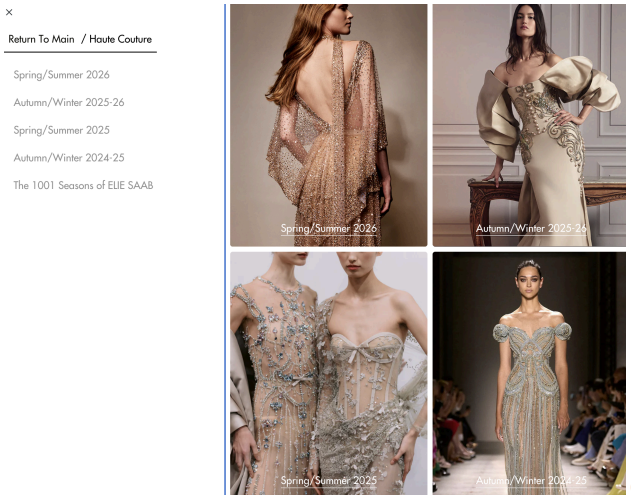


“Email us” section (not emails written out) and add “CALL US” section with phone number

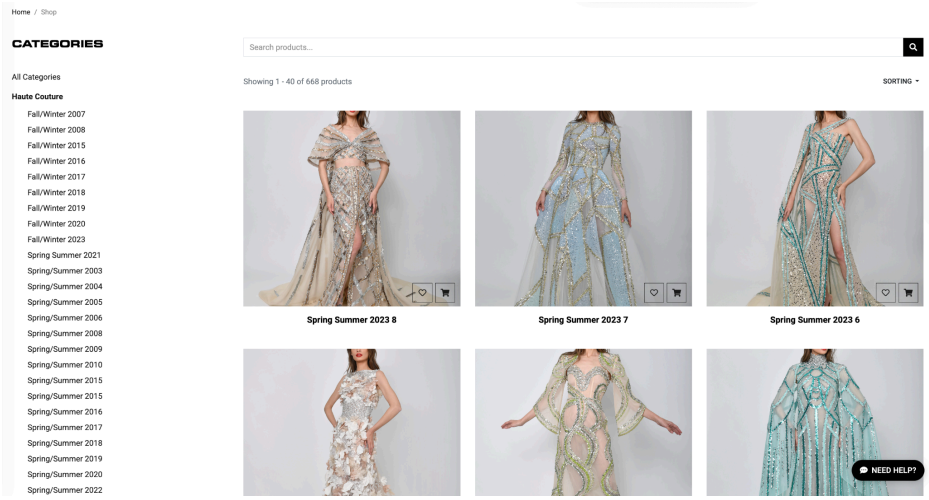
HAUTE COUTURE PORTION

All this should not pop up, only latest collections (all olders collections can be accessed once they full enter couture segment of website)

- Remove “edits” sections



example

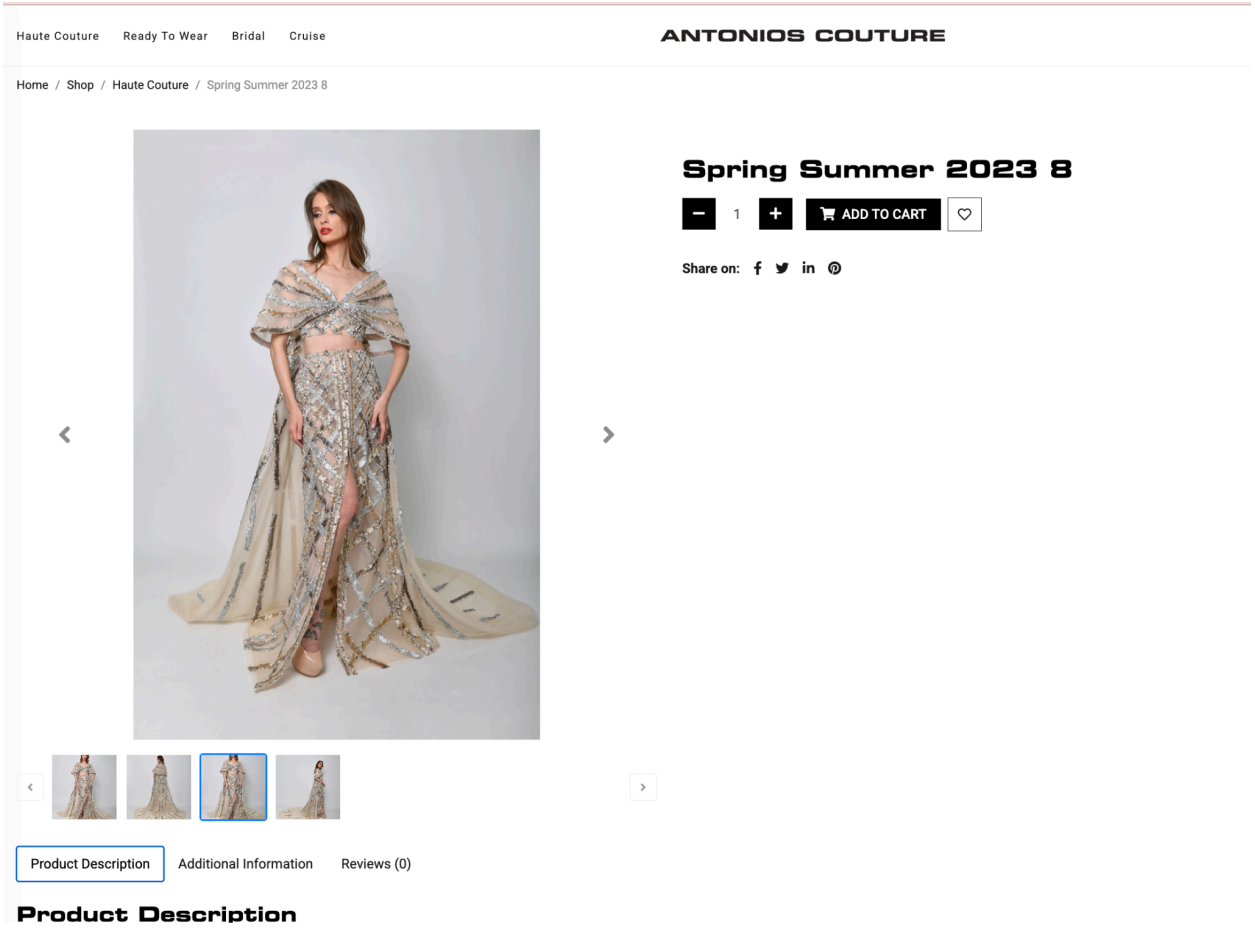


-Latest collection images pop up on right
-”all collections” or “all seasons”, not all categories…must be latest to oldest (2025, 2024–2003)
-remove “spring summer 2023” / all season for product description, must only be “look 8”

No filter by price in haute couture sections (only for ready to wear and cruise, and price max should be much higher than $1000)

Images fixed so i can see full dress / most of the dress, cut up unnecessary background / top of the image that is just the ceiling

Remove search products



When couture product is clicked- rework this whole section
- NO ADD TO CART
- product details, inquire ab product ect, should be on right side (ex below)
- fix font to more clean and chic one

Couture | Spring-Summer 2026 > **LOOK 2**

LOOK 2

LOOK 2

Inquire Now

Details

Shipping & Returns

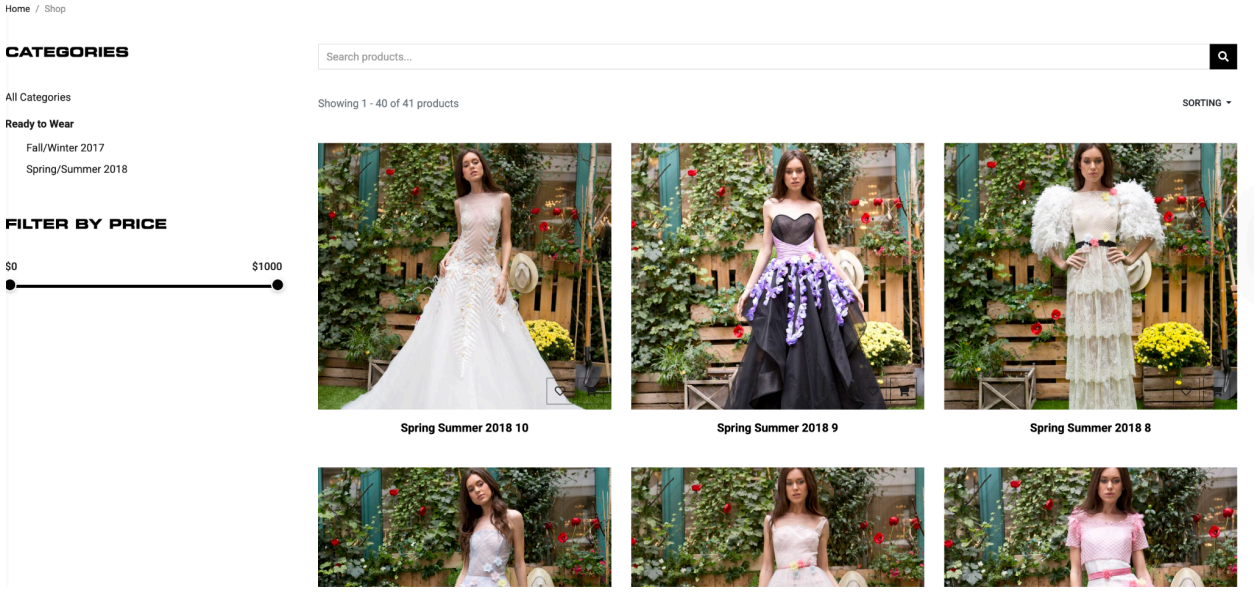
Contact Us

This is what should pop up when couture piece is selected

- Inquire now
- details
- Contact us

(shipping and return policy can remain in their seperate section)

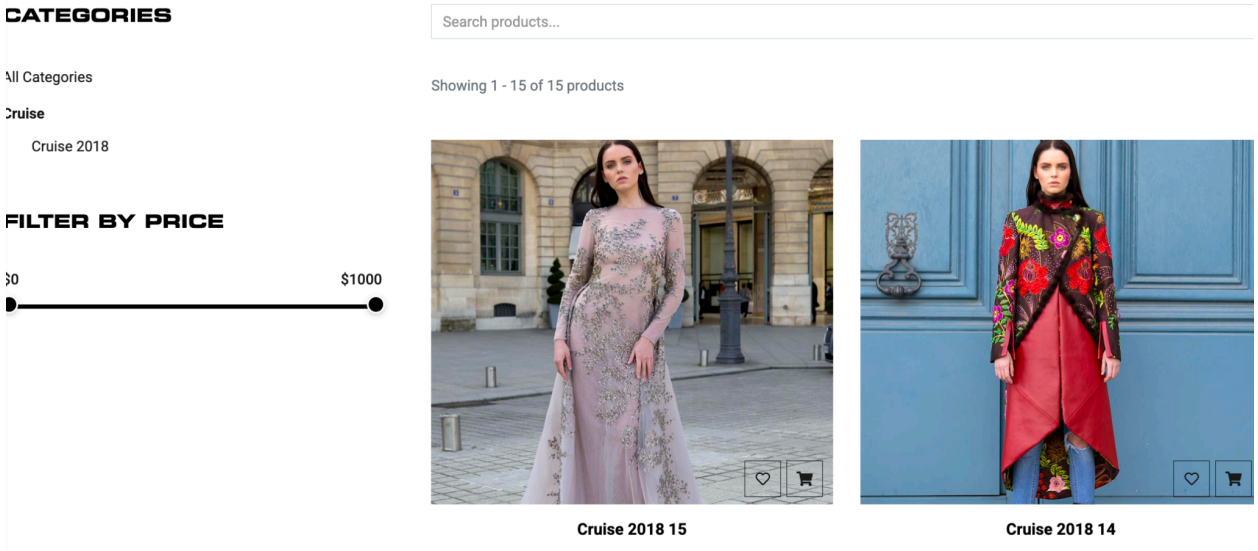
READY TO WEAR



Same comments

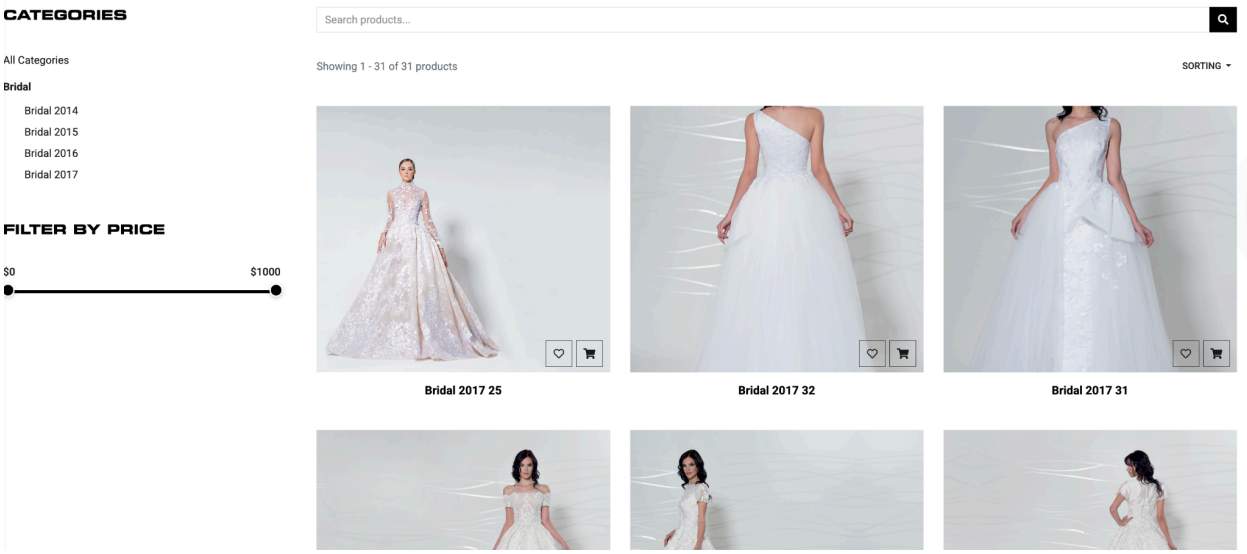
- No filter by price
- “All collections” not all categories
    - 2018 before 2017
- No “spring summer 2018 10” only “Look 10”
- Remove “search product”

CRUISE



Same comments

BRIDAL



ADD BRIDAL VIDEO (COMPILATION OF BRIDAL REELS from latest bridal collection) at top of bridal page

- Below that Latest bridal collection images only on right (other collection images appear when customer seclects that collection on the left)

Same comments

- 2017 to 2014
- remove" filter by price" and "search product"
- Change "categories" font to more clean and chic, and write "collections" not categories
- 
So we start bridal page with horizontal video like this with bridal designs
